WORK EXPERIENCE

Software Engineer Intern - Goodlord

Jul 2024 - Aug 2024

- Collaborated with a team of 5 developers to implement new features for the Tenancy Management System within the first month.
 - Helped implement a new Agency Dashboard Signup form, replacing outdated technology.
 - Designed database structure to handle form data storage efficiently.
 - Implemented a secure way of accessing and submitting the form to prevent potential misuse.
-

EDUCATION

Bachelor of Software Engineering

Sep 2022 - Jun 2025

Sheffield Hallam University

- Key modules: Professional Software Projects, Software Architecture and Design, Web Development, Mobile Development, Programming, Management of I.T. Projects

Bachelor of Software Engineering

Sep 2021 - Aug 2022

Igor Sikorsky Kyiv Polytechnic Institute

- Key modules: Algorithms and Data Structures, Programming, Mathematics
-

PROJECTS

3Squared Train Map

- Collaborated in a team to develop a National Rail Network Map, delivering real-time freight train data across the UK as part of a university module.
- Utilized Leaflet to map locations and ensure accurate visualization of the rail network.
- Implemented schedule comparison features to enhance user functionality and decision-making.

Modern Gym Management System

- Developed a Gym Management System for a university group project, enabling users to register, book classes, follow workout plans, and access custom diets.
- Created progress tracking functionality to help users monitor their fitness goals.
- Utilized Laravel for backend development and MySQL for database management.

React Chess

- Developed React Chess, an online multiplayer chess platform that allows players to compete against each other.
- Created an interactive gameplay experience with highlights for all possible moves to help users enhance their chess skills.

Sokapp - Online Lesson Booking Platform

- Developed Sokapp, a platform enabling teachers to sell lessons and users to book them seamlessly. Added Stripe integration for handling online payments
-

SKILLS

- **Languages:** JavaScript, TypeScript, PHP, Python, C#, SQL
- **Frameworks:** React.js, Next.js, Laravel, Symfony, Flutter, Tailwind CSS
